SPRINGFIELD, Mo. (Edited News Release/KY3) - CoxHealth added much-needed space by purchasing the JPMorgan Chase Bank building.

The building is located at 303 East Republic Road in Springfield. With its proximity to Cox South, the new campus will position the health system to provide expanded capacity and flexibility as we continue to experience unprecedented growth.

While plans for the facility are in the early stages, leaders expect the property to house a blend of functions. The purchase allows for significant expansion at a fraction of the cost of new construction.

"The opportunity to add this much capacity in this location comes at a great time for CoxHealth," says Max Buetow, CoxHealth's President and CEO. "This expansion positions us well to continue meeting our community's needs."

In April 2024, CoxHealth will take possession of approximately 60,000 square feet of space in the campus' south building. JPMorgan Chase Bank will continue to be a tenant in other areas of the campus.
